

# TABLE OF CONTENTS

|   |            |
|---|------------|
| <b>CHAPTER 1 (LIMIT OF A FUNCTION)</b>                    | <b>1</b>   |
| 1.1 Concept of a Limit                                    | 2          |
| 1.2 Theorems on Limits                                    | 10         |
| 1.3 Limits of some Transcendental Function                | 19         |
| 1.4 Infinite Limits of some Transcendental Function       | 29         |
| 1.5 Continuity and Its Consequence                        | 43         |
| <b>CHAPTER 2 (DIFFERENTIATION)</b>                        | <b>55</b>  |
| 2.1 The Derivative  | 56         |
| 2.2 Rules on Differentiation                              | 69         |
| 2.3 Techniques on Differentiation                         | 81         |
| 2.4 Application of Derivative                             | 93         |
| <b>CHAPTER 3 (INTEGRATION)</b>                            | <b>117</b> |
| 3.1 Antiderivative  | 118        |
| 3.2 Indefinite Integral                                   | 121        |
| 3.3 Chain Rule for Integration                            | 129        |
| 3.4 Integration of Trigonometric Functions                | 133        |
| 3.5 Integration Yields to Inverse Trigonometric Functions | 137        |
| 3.6 Integration of Exponential and Logarithmic Functions  | 141        |
| 3.7 Integration of Inverse Trigonometric Functions        | 149        |
| 3.8 Summation Notation                                    | 151        |
| 3.9 Riemann Sums  | 157        |
| 3.10 Definite Integral                                    | 165        |
| 3.11 Area Under Curve                                     | 175        |
| <b>CHAPTER 4 (SEPARABLE DIFFERENTIAL EQUATION)</b>        | <b>185</b> |
| 4.1 Separable Differential Equation                       | 186        |
| 4.2 Exponential Growth and Decay Model                    | 191        |
| 4.3 Bounded Growth and Decay Model                        | 199        |
| 4.4 Logistic Growth Model                                 | 205        |
