Part I Physiologic Basis and Management of Fluid, Electrolyte, and Acid-Base Disorders

1	Body Fluid Compartments	3
	Terminology	3
	Units of Solute Measurement	3
	Conversions and Electrolyte Composition	4
	Osmolarity Versus Osmolality	5
	Total Osmolality Versus Effective Osmolality	6
	Isosmotic Versus Isotonic	7
	Body Fluid Compartments	7
	Water Movement Between ECF and ICF Compartments	8
	Suggested Reading	13
2	Interpretation of Urine Electrolytes and Osmolality	15
	Certain Pertinent Calculations	16
	Fractional Excretion of Na^+ (FE_{Na}) and Urea (FE_{urea})	16
	Fractional Excretion of Uric Acid (FE_{UA}) and Phosphate (FE_{PO_4})	17
	Urine Potassium (U_{K}) and Urine Creatinine (U_{Cr}) Ratio	17
	Urine Anion Gap	18
	Electrolyte-Free Water Clearance	19
	Urine Creatinine and Urine Volume	20
	Urine Specific Gravity Versus Urine Osmolality	20
	Suggested Reading	22
3	Kidney Handling of NaCl and Water	25
	Proximal Tubule	25
	Na^+ Reabsorption	25
	Cl^- Reabsorption	27
	Thin Limbs of Henle's Loop	28
	Distal Convoluted Tubule	30
	Connecting Tubule	32
	Collecting Duct	32
	Water Reabsorption	33
	Proximal Tubule	33

Loop of Henle	34
Distal Nephron	34
Effect of Various Hormones on NaCl and Water Reabsorption (Transport)	34
Disorders of NaCl Transport Mechanisms	35
Suggested Reading	37
4 Intravenous Fluids: Composition and Indications	39
Crystalloids	40
Dextrose in Water	40
Sodium Chloride (NaCl) Solutions	41
Dextrose in Saline	42
Balanced Electrolyte Solutions	42
Colloids	43
Albumin	43
Goals of Fluid Therapy	44
How Much Fluid Is Retained in the Intravascular Compartment?	44
Maintenance Fluid and Electrolyte Therapy	46
Fluid Therapy in Special Conditions	47
Volume Contraction	47
Septic Shock	48
Hemorrhagic Shock Due to Gastrointestinal Bleeding	48
Hemorrhagic Shock Due to Trauma	48
Cardiogenic Shock	49
Adult Respiratory Distress Syndrome (ARDS)	49
Phases of Fluid Therapy in Critically Ill Patients	50
Suggested Reading	53
5 Diuretics	55
Classification of Diuretics	55
Physiologic Effects of Diuretics	57
Clinical Uses of Diuretics	58
Complications of Diuretics	59
Diuretic Breaking Phenomenon	60
Diuretics and Urinary Electrolytes	60
Recently Introduced Diuretics or Drugs with Diuretic-like Effects	60
Furosemide	60
Sodium Glucose Cotransporter-2 (SGLT2) Inhibitors	61
Neprilysin Inhibitor	61
Suggested Reading	63
6 Disorders of Extracellular Fluid Volume: Basic Concepts	65
Mechanisms of Volume Recognition	65
Conditions of Volume Expansion	67
Concept of Effective Arterial Blood Volume (EABV)	67
Formation of Edema	68
Suggested Reading	70

7 Disorders of ECF Volume: Heart Failure	71
Clinical Evaluation	72
Treatment of HF	73
Management of Edema	73
Ambulatory Patient	73
In-hospital Patient with Acute Decompensated Heart Failure (ADHF)	74
Postdischarge Management	76
Cardiorenal Syndrome	76
Suggested Reading	79
8 Disorders of ECF Volume: Cirrhosis of the Liver	81
Clinical Evaluation	83
Treatment of Edema	83
Formation of Ascites	84
Treatment of Ascites	85
Salt Restriction	86
Diuretics	86
Large-Volume Paracentesis	86
Refractory Ascites	87
Hepatorenal Syndrome	88
Pathogenesis	89
Treatment	90
Other Treatment Modalities	91
Suggested Reading	93
9 Disorders of ECF Volume: Nephrotic Syndrome	95
Clinical Evaluation	97
Treatment	98
Suggested Reading	101
10 Disorders of ECF Volume: Volume Contraction	103
Dehydration vs. Volume Depletion	103
Causes	104
Types of Fluid Loss	104
Clinical Evaluation	105
Treatment	106
Dehydration	106
Volume Depletion	106
Suggested Reading	108
11 Disorders of Water Balance: Physiology	109
Control of Thirst	109
Structure and Synthesis of ADH	110
Control of ADH Release	110
Copeptin	111
Distribution of Aquaporins in the Kidney	112

Mechanism and Actions of ADH	112
Mechanism	112
Actions	113
Urinary Concentration and Dilution	114
Measurement of Urinary Concentration and Dilution	115
Calculation of Electrolyte-Free Water Clearance	116
Disorders of Water Balance	117
Study Questions	117
Suggested Reading	118
12 Disorders of Water Balance: Hyponatremia	119
Development of Hyponatremia	119
Approach to the Patient with Hyponatremia	119
Step 1: Measure Serum Osmolality	119
Step 2: Measure Urine Osmolality and Urine Na ⁺ Concentration	120
Step 3: Estimate Volume Status	120
Step 4: Obtain Pertinent Laboratory Tests	121
Step 5: Know More About Pseudo- or Factitious Hyponatremia	122
Step 6: Know More About Hypertonic (Translocational) Hyponatremia	123
Step 7: Rule Out Causes Other Than Glucose that Increase Plasma Osmolality	123
Pathophysiology of Hyponatremia	123
Specific Causes of Hyponatremia	124
Syndrome of Inappropriate Antidiuresis	125
Cerebral Salt Wasting or Renal Salt Wasting Syndrome	128
Nephrogenic Syndrome of Inappropriate Antidiuresis	129
Reset Osmostat	129
Thiazide Diuretics	129
Ecstasy	130
Selective Serotonin Reuptake Inhibitors	130
Exercise-Induced Hyponatremia	130
Beer Potomania	131
Poor Oral Intake	131
Postoperative Hyponatremia	131
Hypokalemia and Hyponatremia	132
Psychogenic Polydipsia	133
COVID-19 and Hyponatremia	133
Diagnosis of Hypotonic Hyponatremia	134
Clinical Manifestations of Hyponatremia	134
Brain Adaptation to Hyponatremia	135
Complications of Untreated Chronic Hyponatremia	136
Treatment of Hyponatremia	136
Treatment of Acute Symptomatic Hyponatremia	136
Treatment of Chronic Severe Symptomatic Hyponatremia	138
Complication of Rapid Correction of Hyponatremia	139

Risk Factors	140
Clinical Manifestations	140
Diagnostic Test	140
Management and Prognosis	140
Treatment of Asymptomatic Hyponatremia in Hospitalized Patients	141
Treatment of Asymptomatic Chronic Hyponatremia Due to Syndrome of Inappropriate Antidiuresis: Ambulatory Patients	142
Treatment of General Causes of Hyponatremia	143
Study Questions	145
Suggested Reading	163
13 Disorders of Water Balance: Hypernatremia	165
Mechanisms of Hypernatremia	165
Patients at Risk for Hypernatremia	166
Approach to a Patient with Hypernatremia	166
Step 1: Estimate Volume Status	166
Step 2: History and Physical Examination	167
Step 3: Diagnosis of Hypernatremia (See Table 13.1)	167
Brain Adaptation to Hypernatremia	168
Transient Hypernatremia	168
Clinical Manifestations of Persistent Hypernatremia	169
Specific Causes of Hypernatremia	169
Polyuria	169
Central DI	170
Nephrogenic DI	170
Gestational DI	172
Primary Polydipsia	172
Diagnosis of Polyuria	173
Solute Diuresis	175
Hypernatremia in the Elderly	176
Hypodipsic (Adipsic) Hypernatremia	177
Hospital-Acquired Hypernatremia	178
Community-Acquired Hypernatremia	178
Hypernatremia in Intensive Care Units	179
Sodium Toxicity	180
Treatment of Hypernatremia	181
Correction of the Underlying Cause	181
Calculation of Water Deficit	182
Selection and Route of Fluid Administration	182
Volume Status	183
Treatment of Acute Hypernatremia	183
Treatment of Chronic Hypernatremia	183
Treatment of Specific Causes	184

	Hypovolemic Hypernatremia	184
	Hypervolemic Hypernatremia	184
	Normovolemic (Euvolemic) Hypernatremia	184
	Nephrogenic DI	184
	Study Questions	185

Secondary Physiologic Response to Respiratory Alkalosis (Hypocapnia)	632
Mechanism of Secondary Physiologic Response	633
Causes of Acute and Chronic Respiratory Alkalosis	633
Selected Conditions of Respiratory Alkalosis	634
Clinical Manifestations	636
Acute Respiratory Alkalosis	636
Chronic Respiratory Alkalosis	637
Diagnosis	638
Suggested Reading	643
40 Mixed Acid–Base Disorders	645
Analysis of Mixed Acid–Base Disorders	646
Metabolic Acidosis and Metabolic Alkalosis	646

Metabolic Acidosis and Respiratory Alkalosis	648
Metabolic Acidosis and Respiratory Acidosis	649
Metabolic Alkalosis and Respiratory Alkalosis	649
Metabolic Alkalosis and Respiratory Acidosis	650
Hyperchloremic (non-AG) metabolic acidosis and high AG metabolic acidosis	650
Acute Respiratory Acidosis and Chronic Respiratory Acidosis	651
Triple Acid-Base Disorders	651
Treatment	652
Metabolic Acidosis and Metabolic Alkalosis	652
Metabolic Acidosis and Respiratory Alkalosis	652
Metabolic Acidosis and Respiratory Acidosis	652
Metabolic Alkalosis and Respiratory Alkalosis	652
Metabolic Alkalosis and Respiratory Acidosis	653
Suggested Reading	657
41 Drug-Induced Acid-Base Disorders	659
Metabolic Acidosis	659
Metabolic Alkalosis	662
Respiratory Acidosis	663
Respiratory Alkalosis	664
Suggested Reading	665
Part II Fluid, Electrolyte, and Acid-Base Disorders in Special Conditions	
42 Acute Kidney Injury	669
Definition	669
Fluid and Sodium (Na) Balances	670
Potassium (K) Balance	670
Calcium (Ca) Balance	671
Phosphate Balance	671
Magnesium (Mg) Balance	671
Acid-base Disorders	671
Suggested Reading	672
43 Chronic Kidney Disease	673
Water Balance	674
Sodium (Na) Balance	675
Potassium (K) Balance	675
Calcium (Ca) Balance	676
Phosphate Balance	676
Magnesium (Mg) Balance	677
Acid-base Disorders (see Chap. 36)	677
Suggested Reading	678

44 Kidney Transplantation	681
Volume Changes	681
Electrolyte Abnormalities	682
Acid-base Disorders	683
Suggested Reading	684
45 Liver Disease	685
Water Balance	685
Sodium Balance	686
Potassium (K) Balance	687
Calcium Balance	687
Phosphate Balance	687
Magnesium (mg) Balance	688
Acid-Base Disorders	688
Suggested Reading	689
46 Pregnancy	691
Hemodynamic Changes	691
Volume Changes	692
Electrolyte Abnormalities	692
Acid-Base Disorders	693
Others	694
Suggested Reading	695
47 Cancer	697
Fluid Balance	697
Electrolyte Abnormalities	698
Hyponatremia	698
Hypernatremia	699
Hypokalemia	699
Hyperkalemia	700
Hypocalcemia	700
Hypercalcemia	701
Adult T-Cell Leukemia/Lymphoma	703
Drugs and Hypercalcemia	703
Immune Checkpoint Inhibitors and Hypercalcemia	703
Hypophosphatemia	704
Hyperphosphatemia	705
Hypomagnesemia	705
Acid-Base Disorders	706
Suggested Reading	707
48 Total Parenteral Nutrition	709
Fluid Balance	710
Electrolyte Abnormalities	710
Total Parenteral Nutrition (TPN): Fluid Balance	710

Hypernatremia	710
Hypokalemia	711
Hyperkalemia	711
Hypocalcemia	712
Hypercalcemia	712
Hypophosphatemia	712
Hyperphosphatemia	713
Hypomagnesemia	713
Hypermagnesemia	714
Acid–Base Disorders	714
Metabolic Acidosis	714
Metabolic Alkalosis	715
Respiratory Acidosis	715
Respiratory Alkalosis	716
Suggested Reading	716
Index	719
