

CONTENTS

Preface **iii**

Dedication **v**

Chapter 1

Circles 1

Unit 1.1: Introduction to Conic Section **2**

Unit 1.2: Introduction to Circles **3**

Unit 1.3: Form of a Circle **3**

Unit 1.4: General Form and Standard Form of a Circle **5**

Unit 1.5: Circles Determine by Different Conditions **8**

Unit 1.6: Tangent to a Circle **12**

Unit Exercises **23**

Chapter 1 Review Problems **35**

Chapter 2

Parabola 37

Unit 2.1: Introduction to Parabola **38**

Unit 2.2: General Form and Standard Form of a Parabola **40**

Unit 2.3: Parabola with Vertex at the Origin **41**

Unit 2.4: Parabola with Vertex at (h, k) **44**

Unit 2.5: Parabola Determined by Different Conditions **47**

Unit 2.6: Parabola and a Line **54**

Unit 2.7: Some Applications of Parabola **56**

Unit Exercises **61**

Chapter 2 Review Problems **77**

Chapter 3

Ellipse 79

Unit 3.1: Introduction to Ellipse **80**

Unit 3.2: General Form and Standard Form of Ellipse **83**

Unit 3.3: Ellipse with Center at the Origin **85**

Unit 3.4: Ellipse with Center at (h, k) **92**

Unit 3.5: Tangent to the Ellipse **98**

Unit 3.6: Some Applications of Ellipse **101**

Unit Exercises **105**

Chapter 3 Review Problems **117**

Chapter 4

Hyperbola 119

Unit 4.1: Introduction to Hyperbola **120**

Unit 4.2: General Form and Standard Form of Hyperbola **124**

Unit 4.3: Hyperbola with Center at the Origin **127**

Unit 4.4: Hyperbola with the Center at (h, k)	133
Unit 4.5: Some Applications of Hyperbola	139
Unit Exercises	143
Chapter 4 Review Problems	155

Chapter 5

System of Nonlinear Equations 157

Unit 5.1: Nonlinear Equations	158
Unit 5.2: Systems of Nonlinear Equations	158
Unit Exercises	165
Chapter 5 Review Problems	169

Chapter 6

Series and Mathematical Induction 171

Unit 6.1: Sequences	172
Unit 6.2: Series	173
Unit 6.3: Arithmetic Sequence	176
Unit 6.4: Geometric Sequence and Geometric Series	179
Unit 6.5: Mathematical Induction	182
Unit 6.6: Binomial Theorem	185
Unit Exercises	189
Chapter 6 Review Problems	203

Chapter 7

Circular Functions 205

Unit 7.1: Introduction to Circular Functions	206
Unit 7.2: Degree Measure and Degree Radian Measure	206
Unit 7.3: Standard Angle and Coterminal Angle	211
Unit 7.4: Circular Functions	213
Unit 7.5: Graphing the Six Circular Functions	217
Unit 7.6: Problems Involving Circular Functions	234
Unit Exercises	238
Chapter 7 Review Problems	255

Chapter 8

Trigonometric Identities 257

Unit 8.1: Identity and Conditional Equations	258
Unit 8.2: Fundamental Trigonometric Identities	258
Unit 8.3: Sum and Difference of Two Angle Identities	263
Unit 8.4: Double Angle Formulas	269
Unit 8.5: Half-Angle Formulas	273
Unit Exercises	278
Chapter 8 Review Problems	298

Chapter 9

Inverse Trigonometric Functions 301

- Unit 9.1: Introduction to Inverse Trigonometric Functions 302
- Unit 9.2: Inverse Trigonometric Functions 302
- Unit 9.3: Trigonometric Equations 306
- Unit Exercises 311
- Chapter 9 Review Problems 315

Chapter 10

Polar Coordinates 317

- Unit 10.1: Introduction to Polar Coordinates 318
- Unit 10.2: Plotting of Points 319
- Unit 10.3: Relationship between Rectangular and Polar Coordinates 322
- Unit Exercises 327
- Chapter 10 Review Problems 331
